

FOR IMMEDIATE RELEASE

NOTICE TO OUR RESIDENTS

## **Boil Water Notice (San Jose Water)**

On October 22, 2014, the San Jose Water Company sent a Boil Water Notice to their customers that they had received a water sample test positive for E Coli, near Landess Avenue in the City of San Jose. **The City of Milpitas customers are not connected to their system and are not affected.** Our water sample testing has confirmed that our water [has not been affected, is safe, and meets all state testing requirements.](#)

There is a school called Milpitas Christian School, which is not in Milpitas, which has also been affected. Below is a link to the NBC story online, which has a useful map that shows the affected areas and the school:
